## About Me

---

With three years of experience as a web developer and a bachelors degree in Industrial Design I am a great fit for startups and organizations that can benefit from both my creative and technical skills

## Experience

---

### FullStack Web Developer

Argentina | Remote

AVES ARGENTINAS

2024 - Present

- Developed a website to promote regions of Argentina as Key Biodiversity Areas with features like a blog with a custom CMS, interactive maps, and various search functions. The project is done with Nextjs for the frontend and PocketBase for the backend.
- Leveraged Vercel and PocketHost to deploy the project. The free plans of these services reduce maintenance costs without a big impact on performance. This is especially important for an ONG. And having the CI/CD handled out of the box allowed me to work faster.

### FrontEnd Web Developer

France | Remote

WE GO GREENR

2022 - 2024

- Led the technical team of 4 developers to handle deadlines and technical debt to move the project forward. I had the opportunity to work very closely with the CEO and PM to understand the product needs and define the best ways we could handle those challenges. I made quick prototypes and then led the technical team to implement those features.
- During a major refactor of the app, I was responsible for keeping our Redux store in sync between the old and the new version while fixing the bugs it had. I collaborated with Infra to serve the old and new versions, handling the migration progressively. Apart from my technical duties, I made a new design system with reusable components while being cohesive with the original design.
- Led development work to focus on client conversions and advocated for dedicating development time to implement automated testing in critical features of our app. These efforts allowed the company to review its business model and priorities, resulting in the acquisition of new clients.

### Frontend Web Developer

Argentina | Remote

WE ARE PSH

2020 - 2022

- Developed from scratch an internal platform with React and Strapi (self-hosted) to handle and scale communication within the company. I did most of the frontend and organized most of the content-types in Strapi to then connect them using the GraphQL API.
- Managed multiple clients, being responsible for project estimation, development, and the onboarding of new team members to those different projects. These were mostly marketing sites and blogs developed with React, Gatsby, and Nextjs.

## Skills

---

**Main** JavaScript, Typescript, React.js, Next.js, Node.js, HTML, CSS

**Complementary** Figma, Linux, SQL, Git & Github Actions, Bash, Docker

**Spoken Languages** English, Spanish

## Education

---

### Universidad de Buenos Aires

Buenos Aires, Argentina

BACHELOR OF INDUSTRIAL DESIGN

2016 - 2021

## Courses

---

### Cambridge English

Buenos Aires, Argentina

ENGLISH FIRST CERTIFICATE (FCE) B2

2014

### Universidad Técnica Nacional

Buenos Aires, Argentina

AUDITED OPERATIVE SYSTEMS COURSE

2024

2024-09-16
