Front-end developer

A front-end-focused web developer with three years of experience and a background in Industrial Design. Collaborated with both designers and back-end developers, praised for bridging the gap between technical and non-technical team members.

Professional Experience

Lead Front-end developer at We Go GreenR

July 2020 - Present | France (Remote)

We Go GreenR is a startup that showcases green apartments for tourists to rent and assists hosts in achieving ecological standards through their app.

Stabilization of the Web App

- Restored the functionality of the **JavaScript** and **PHP** web app, fixing multiple critical bugs.
- Enhanced app performance by optimizing global state management, reducing **Redux** usage in favor of **Next.js** SSR (Server Side Rendering).
- Teamed up with back-end developers to optimize database queries and clean back-end code to reduce load times.

Homepage Refactoring

- Redesigned the homepage to improve UX and boost client conversions.
- Set up a **Figma** design system based on the current branding, to improve UI consistency and speed up the design process.
- Implemented the new homepage using **TypeScript**, **Tailwind CSS**, and **Next.js** (React), creating reusable components as part of the new design system.
- Decreased bug reports introducing automated testing with **React Testing Library**, **MSW**, and **Jest**.

Team Leadership and Process Enhancement

- Led the recruitment of 3 junior developers, and mentored 4 team members on best practices such as semantic **HTML** and **Git** workflows like Gitflow helping them achieve autonomy as fast as possible.
- Helped the company owner to design and prioritize new features, aligning technical initiatives with business objectives and timelines.
- Advocated for and implemented agile methodologies. Served as **SCRUM** master optimizing team workflow and development efficiency.

Freelance Front-end Developer at Aves Argentina

July 2022 - November 2022 | Argentina (Remote)

Aves Argentinas contacted me to develop kbadeargentina.org, a website that promotes regions of Argentina to be Key Biodiversity Areas (KBA).

- Built a website from the ground up using **Next.js**, **React**, **TypeScript**, and **Styled-Components**.
- Developed an interactive map using **OpenLayers**, enabling users to dynamically visualize and filter KBA locations
- Implemented search functionality allowing users to find specific KBA regions, animals, or plants.
- Conducted design reviews to ensure adherence to project requirements, enhance visual appeal, and meet deadlines.
- Leveraged **Vercel** for CI/CD deployment, ensuring good development experience and facilitating maintenance.
- Simplified data integration with a **Node.js** tool to migrate data from Excel to JSON format, minimizing friction with the client accustomed to Excel.

Front-end Developer at We Are PSh

November 2020 - July 2022 | Argentina (Remote)

We Are PSh is a software factory specializing in edtech where I started my professional journey in tech.

We Are PSh Website Revamp

- Revamped the company website using **Gatsby** and **React** enhancing site performance, SEO, and developer experience.
- Integrated **Lottie** animations, improving the site's visual appeal and interactivity.
- Increased website performance going from 75 to 98 in Google Lighthouse scoring, contributing to higher search engine rankings.

Internal Blog Development

- Developed an internal blog for We Are PSh, utilizing **React** and **Strapi**.

Client Projects and Mentorship

- Contributed to multiple client projects, web apps, custom forms, and marketing sites using **Node.js**, **TypeScript**, **React**, and **Next.js**.
- Guided 4 junior developers during the onboarding of our team.
